## Summary

Highly motivated and detail-oriented Electrical Engineering graduate with a strong foundation in electrical system, circuit design and power distribution. Proficient in using Automation industry-standard software and tools including PLC, SCADA. Demonstrated ability to work collaboratively in team environments and effectively in team

## Education

### SSC

63.40%

Maharastra State Board

2015-2016

### Diploma

72.12

Maharastra State Board of Technical Education

2018-2020

### HSC

56.46%

Maharastra State Board

2017-2018

### Bachelor of Engineering

7.98 CGPA

Savitribai Phule Pune University

2020-2023

## Projects

### Diploma Project

E Vehicle Charging Station

2018-2020

### Degree Project

Distribution transformer of leakage reactance

2020-2023

## Skills

### Automation

Implementing and maintaining automation tools and software to enhance efficiency and reliability of systems and processes.

### Automotive Security

branch of computer security focused on the cyber risks related to the automotive context.

### SCADA

Supervisory Control and Data Acquisition (SCADA) is a system that aims to monitor and control field devices at your remote sites.

## Certifications and Internship

### Industrial Automation Workshop

Autotech Nashik

2022

### Artisan Training

BOSCH

2022

### CyborgSysz Pvt.Ltd

Service Engineer

Jan2022 - Feb2022

Production information from end-to-end to perform an in-depth analysis of manufacturing routes to see the root cause of any problem
